About Me

DevOps Engineer with strong understanding in cloud-native application deployment, CI/CD pipeline automation using Jenkins, infrastructure-as-code with Terraform, and container orchestration with Docker and Kubernetes on AWS. Passionate about streamlining delivery pipelines, improving system reliability, and adopting DevOps practices.

Education

Bachelor of Technology (B.Tech) – Computer Engineering Sept 2022 - June 2025
D.Y.Patil University, School of engineering and technology, Ambi, Pune
CGPA: 8.42

Diploma – Computer Engineering Aug 2019 - July 2022
G.M.C Polytechnic, Shahada, Maharashtra
Percentage: 85.26

Technical Skills

Cloud Platforms: AWS
Operating Systems: Linux/Unix, Windows
Programming Language: Python
Version Control System: Git, GitHub
CI/CD Tools: Jenkins
Containerization and Orchestration: Docker, Kubernetes
Infrastructure as Code (IaC): Terraform
Configuration Management: Ansible
Monitoring: Grafana, Prometheus
Database Management: MySQL

Experience

DevOps Intern – Delfine India Technology Jan 2025 - June 2025

- Implemented a full-stack CI/CD pipeline using **Jenkins** integrated with **GitHub** and **Docker**.
- Automated application deployment to **AWS EC2** instances, reducing manual effort and ensuring consistency.
- Containerized microservices using **Docker** and optimized **Dockerfile** for performance.
- Reduced deployment downtime by 99 percent through automation and best practices in **CI/CD**.

Projects

Deployed Netflix web application clone using CI/CD [GitHub](#) | [Portfolio](#)

- Deployed a Netflix application using a complete CI/CD pipeline.
- Configured Jenkins for automated build, test, and deployment workflows.
- Deployed the containerized app on AWS EC2 using Docker.
- Gained expertise in CI/CD, cloud deployment, version control, and automation tools.

Certifications

- Python Programming**
- AWS Educate Introduction to Cloud 101**
