Tejas Chitte

CLOUD & DEVOPS ENGINEER

Summary

Cloud & DevOps Engineer experienced in designing scalable, secure, and automated infrastructures using CI/CD, Infrastructure as Code (IaC), and containerization. Adept at accelerating deployments and enhancing system reliability through automation, monitoring, and cloud-native solutions.

Experience

Delfine India Technology

Jan 2025 - Jun 2025

DevOps Intern

Pune

- Implemented a full-stack CI/CD pipeline using Jenkins integrated with GitHub and Docker
- Automated application deployment to AWS EC2 instances, reducing manual effort and ensuring consistency.
- Containerized microservices using Docker and optimized Dockerfile for performance.
- Reduced deployment downtime by 99% through automation and best practices in CI/CD.

Education

D.Y.Patil University, School Of Engineering And Technology, Ambi, Pune

2022 - 2025

Computer Engineering 8.42 CGPA

Bachelor of Technology

G.M.C Polytechnic, Shahada Computer Engineering

2019-2022

85.26%

Diploma

Projects

Deployed Netflix web application clone using CI/CD 🜐

- Deployed a Netflix application using a complete CI/CD pipeline
- Configured Jenkins for automated build, test, and deployment workflows.
- Deployed the containerized app on AWS EC2 using Docker.
- Gained expertise in CI/CD, cloud deployment, version control, and automation tools.

Swiggy Application Deployment

- Replaced manual deployment processes with fully automated CI/CD using Jenkins, Terraform, and Docker.
- Embedded security and code-quality checks using SonarQube, OWASP ZAP, and Trivy.
- Resulted in 70% faster release cycles and reduced human errors by 90%.

Skills

AWS, Docker, Kubernetes, Jenkins, Terraform, Ansible, Prometheus, Grafana, Linux, Shell Scripting, Git and GitHub, Java, Web Development,
